

COVID-19 SECURE!

COVID-19 has caused chaos all over the world...here at Hawkins Beauty Clinic you can take a step back from all the worry and madness and take time out for YOU, to relax and rejuvenate.

We are 100% COVID-19 secure with screens at reception and at the manicure table. Full PPE is worn by all our staff including reception staff with regular hand washing AND sanitising throughout the day. ALL treatments are performed in a way that keeps both you and our staff members safe with gloves, aprons masks and visors worn by staff throughout your treatment. And yes! We are now able to do all facial treatments! Although we cannot have as many appointments per day as normal due to extensive cleaning and sterilisation of the salon and treatment rooms between each client we are ready to welcome you all back while keeping your safety as our number one priority. All clients are asked to wear a face mask and sanitise their hands upon entry to the clinic from our automated sanitising machine as well as wear any PPE that we provide for you; this may include shoe coverings and hair nets. We are also following Government guidelines on Track and Trace therefore upon entry to the salon each client will have their temperature checked and noted and have to fill in a COVID -19 form including time of arrival and departure as well as a contact number.

You can rely on us at Hawkins Clinic to keep our premises as safe as possible for all of our wonderful clients and any new clients that wish to book in with us.
